

# PRESENTATION OF CWMS3000

BY THE COMPANY  
INTELSERVICE

**CWMS<sup>3000</sup>**  
Warehouse management system

THE IT DEPARTMENT OF THE **FIEGE** COMPANY IN RUSSIA faced with the choice of WMS for their own needs, after an extensive search and analysis of opportunities, decided to develop its own software under the title of CIS. German logistics, as carriers of information on warehouse logistics acted as a main customer and a task Creator, software development was dealt with by Russian programmers. After Fiege withdraw in 2008, the IT division obtained permission to separated into an independent business structure for self-promotion product under the trade mark CWMS3000, already having an experience of the outside implementation in the Ukrainian division of the Fiege company.
